PHOTOGRAPHY & AERIAL

PROFILE

Based in Leeds, I'm an architectural, commercial and interiors photographer, also specialising in aerial photography and videography. With a background in corporate graphic design and a BA (Hons) degree in Photography, I bring both creative and commercial perspectives to every project. Having left university, I pursued my passion for graphic design, eventually setting up my own design business in 2011 whilst living in London.

Having moved north after a 14-year stint in the capital, I offer architecture, commercial, property and aerial photography/video. I offer a tailored service for any building or space.

I've always been fascinated by architecture, placemaking, and city developments, defining the way we live, move and interact with a space or place. I'm also interested in how branding can interact with, and shape the way we feel about a place.

WHY WORK WITH ME?

Throughout my career I have worked closely within the commercial property and real estate sectors. Roles including National Advertising Manager at **Strutt & Parker** and Global Lead Graphic Designer at **DTZ** (now **Cushman & Wakefield**) gave me a deep understanding of how imagery is used to market, lease and promote buildings and places.

Combining my unique skill sets as a designer and photographer allows me to create compositionally excellent and technically exact imagery, perfect for a multitude of marketing and documentation uses.

PIE & MASH DESIGN

My branding and graphic design business can help with property branding, hoarding design, brochures, pitch/proposal design, reports, business cards, flyers, banner

stands, property particulars, social media templates, merchandise and much more.

Visit www.pieandmashdesign.com for more details.

Getting prepared to send up the drone at Kingsway Industrial Park, Rochdale

PHOTOGRAPHY

Professional full-frame photography capture as standard using premium Sony lenses and equipment. All post-production is done in-house to the highest quality.

AERIAL PHOTOGRAPHY / DRONE SURVEYS

From 12 to 48MP stills photography taken with a small, powerful drone. Also useful for certain interiors where there is impressive height and/or depth. I also provide drone roof surveys at fixed price.

AERIAL VIDEO

Up to 4K, 60fps video. Interior and exterior. Gives incredibly smooth tracking shots. Usually graded, edited and set to music, or be provided in native format direct from camera for your own editing needs.

PROPERTY BRANDING / DESIGN / PITCH DESIGN

Among other industry sectors (ie legal and financial services), my sister company Pie & Mash Design has provided branding and design services for both commercial and high-end residential projects for over twelve years. We've worked with:

- DTZ (now Cushman & Wakefield)
- Strutt & Parker (Commercial and Residential)
- Savills
- GL Hearn
- Daniel Watney LLP
- Nexus Planning
- Lambert Smith Hampton
- Howard de Walden Estate (Marylebone)
- Lysander Associates.

Opposite are a selection of key projects I have been involved in photographing for some well-known clients.

I've delivered photography and drone services across a broad range of property sectors in Leeds and across the UK, including:

- BTR
- PBSA
- High-rise developments
- Office
- Hotels
- Heritage / Restoration
- Industrial
- Retail
- Construction sites

Experienced in photographing everything from refined interior environments to active construction sites and large-scale mixed-use developments.
